### **What is Hospice?**

It may not be what you expect. Many people think hospice means the end of life. Hospice is a service designed to make you as comfortable as possible during a life-limiting illness or end of life experience. The goal of hospice is comfort and quality of life rather than the pursuit of curative methods.

### **Where does Hospice take place?**

While most people prefer to receive hospice care at home, individuals living in nursing facilities, hospitals, or other assisted living centers are also eligible for hospice care. Hospice is not just for those living at their primary residence.

### **Hospice does not mean giving up hope.**

Hospice does not mean giving up hope. At times, our patients recover from terminal illness due in part to care received while on hospice. At Tender Care, we recognize the value of hope and the importance of faith.

### **Our Team is YOUR Team**

Tender Care represents an entire team of health care professionals whose purpose is to help you.

**Physicians** - Our Medical Director works with your personal physician to build a comprehensive plan to control pain and other symptoms of terminal illness.

**Nurses** - Our trained and experienced nurses will develop and manage a personalized plan of care just for you. We focus on your individual needs and provide your entire family with compassionate, tender care.

**Certified Nurse Assistants** - Some of the most valuable members of our team include well trained professionals who will provide you with the personal care and the help you need for daily living. They also offer companionship and valuable emotional support.

**Other Services** - You and your family will become part of a team of Social Workers, Bereavement Counselors, Chaplains, and Volunteers. Our team is YOUR team.

### **Who pays for hospice?**

Medicare, Part A. Most people get Part A automatically when they turn age 65. They do not have to pay a premium because they or a spouse paid Medicare taxes while working. If you aren't eligible for premium-free Part A, you may be able to buy Part A. Part A covers 99% of hospice expenses leaving next to no out of pocket expenses for the patient. In addition, hospice is covered by most insurance plans. Many people don't realize this coverage includes the following:

- Physician consultations
- Nurse visits
- Medications
- Social Worker visits
- Medical equipment
- Other services not usually covered by Medicare (such as grief counseling)

For a FREE nurse evaluation and to see if you qualify for this valuable service, please contact us at **801-294-0560**.
